

Matched controls isolate preparation and frontend costs

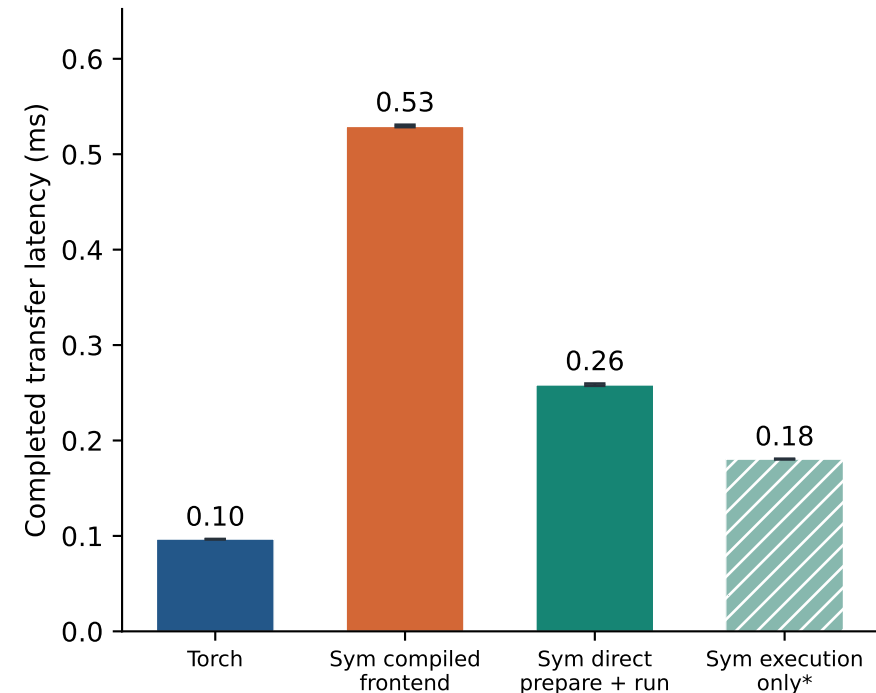

4 MiB int8 weight → 16 MiB float32

128 KiB KV restore (H2D)

128 KiB KV eviction (D2H)

*Preparation outside timer: diagnostic bound, NOT end-to-end performance. Fresh request/output, guards and completion retained.
No profiler; median of 3 round medians × 40 calls, 5 warmups per variant/round. Whiskers show round min-max.
